Federal Facility Identification Data Standard

Foreward

The Federal Facility Identification Data Standard was developed by the Environmental Data Standards Council (EDSC). The EDSC is a partnership among EPA, States and Tribal partners to develop and agree upon data standards for environmental information collection and exchange. The Council seeks to promote efficient sharing of environmental information between State, EPA, and Tribal partners through the development of data standards. More information about the EDSC is available on the EDSC website at www.epa.gov/edsc/.

The Council identifies those areas of information for which having standards will render the most value in achieving environmental results, prioritizes the areas, and pursues the development of data standards. The Council involves Indian Tribes and Nations, other states and federal agencies, business groups, non-governmental organizations, and other interested parties as the standards are developed.

The Federal Facility Identification Data Standard was approved by the EDSC on July 29, 2003 and approved by EPA on November 12, 2003.

Introduction

The Federal Facility Identification Data Standard covers communication of information about facilities that are owned or operated or were owned or operated by the federal government. The purpose of this data standard is to provide a consistent means of identifying facilities owned or operated by the Federal Government. Federal facilities receive attention from the public because of their unique and news-worthy operations, such as launching space shuttles or providing recreation in a national park. The standard, therefore, is intended to include identification information for the federal agency that may be responsible, either through ownership or operational responsibility, for a facility.

An ancillary, but supportive goal, is to provide a consistent means of indicating whether facilities are owned or operated, in whole or in part, by non-federal governments, such as states, Tribes, counties or municipalities. Partners that institute the federal facility data standard may want to follow similar procedures for these non-federal facilities. In addition, federal facilities may share sites with these non-federal facilities, indicating the benefit of including these terms in the Federal Facility Data Standard.

1. Scope

The Federal Facility Identification Data Standard consists of data elements and their permissible values that indicate a facility (or the land it occupies) is owned or operated by the Federal government. Also included is information about the Federal agency or organization that is responsible for the facility or land. The role or management relationship of the responsible party to the facility or land may also be specified.

2. Normative References

Relationships to External Standards

The Federal Facility Data Standard is related to the Facility Identification Data Standard. The data elements "county" and "state," which are in the Federal Facility Data Standard, are similar to the data elements "county name" and "state name," which are in the Facility Data Standard. However, "county" and "state" in the Federal Facility Data Standard refer to owner/operator issues while "county name" and "state name" in the Facility Data Standard refer to location.

The SIC/NAICS Data Standard is related to the Federal Facility Identification Data Standard. SIC and NAICS codes can be assigned to federal facilities. Some SIC and NAICS codes are specific to federal facilities.

Relationships within the Federal Facility Identification Data Standard

Facility Operation Type Name has an associated Facility Operation Type Code

Facility Ownership Type Name has an associated Facility Ownership Type Code

Facility Land Ownership Name has an associated Facility Land Ownership Code

Facility Responsible Agency Name has an associated Facility Responsible Agency Code

Facility Responsible Agency Type Name has an associated Facility Responsible Agency Type Code

Facility Management Type Name has an associated Facility Management Type Code

Federal Facility Identification Number must be associated with Facility Identification Number Context Name

Facility Responsible Agency Name or Code must be associated with Facility Responsible Agency Type Name or Code.

3. Terms and Definitions

- **3.1 Federal Facility** buildings, installations, structures, land, public works, equipment, aircraft, vessels, and other vehicles and property owned by, or constructed or manufactured for the purposes of leasing to, the Federal government or a Federal agency.
- **3.2 Federal Agency** a department or instrumentality of the executive, legislative or judicial branches of the federal government, any independent agency or establishment of the Federal government including any Federal government corporation and the Government Printing Office
- **3.3 Federal Government -** the national government of the United States
- **3.4 Ownership** the legal right of possession; proprietorship
- **3.5 Operation** to take part in, or have the right to take part in, a process of a practical or mechanical nature that results in some form of work or production
